

This news letter is brought to you with an intention of keeping you updated in the field of scientific instrumentation.

April- 2011

SANYO began manufacturing equipment for medical applications in 1974. The highlights of our record so far include the world's first -152°C ultra low temperature freezer in 1991, followed in 1993 by the release of a full range of refrigerators and freezers using our CFC- free refrigerant, a breakthrough achieved in cooperation with industry-leader ICI Chemicals & Polymers Ltd. Our work is inspired by the concept Human-Oriented Design. We design and manufacture our own compressors, then match them with our electronics technologies to create unrivaled products. Performance, durability and speedy maintenance are our hallmarks. **SANYO** Research & Medical Equipment is ready for the challenges of the 21st century now, and you can be sure that we will continue to support advances in physiology, genetics, virology, pharmacology, and leading-edge biotechnology fields.

Vacuum Insulation Panel Series

Products Include

- Deep Freezers Upto -152 degC
- VIP Series Deep Freezers -86 deg C
- Pharmaceutical Refrigerators
- Autoclaves
- Co2 Incubators
- Plant Growth Chambers &
- Biological Safety Cabinets

is a worldwide group specialized in the field of vitro diagnostics for medical and industrial applications. The group was founded by Marcel Merieux, a student of Louis Pasteur, with their pioneer Institute, Merieux Institute in France in 1897, which became a world leader in human and veterinarian vaccines. Since then, bioMerieux has acquired many companies including API Systems, Transgenes and Silliker Group to name a few

bioMerieux Industry is a leading microbiology solutions provider in Food and Pharma Industries, Service labs, research institutions. The company is strongly involved in quality of foods and consumer safety in terms of foods and drugs. We offer a wide range of automated and manual methods, for microbiological control.

bioMerieux's mission is to fight disease by developing innovative tools and to develop a global approach to world health and consumer safety systems management to ensure their long term durability. bioMerieux has a global presence in over 130 countries, 39 subsidiaries, over 100 distributors, 12 manufacturing sites, and 13 R&D sites. Since 1996, bioMerieux has supplied to microbiology laboratories all over India.

Please Call us or route your enquiry to our e-mail for further information

Environmental Control

- Air Monitoring
- Surface Monitoring
- Ready to use Media

Identification of Micro organisms

- Manual Solution
- Semi-Automated Solution
- Automated Solution

Standardized Strains

Bioball

Food Quality Indicators

EMPO

Microbial Strain level Identification

Diversilab

Microbial Detection & Sterility Testing

- Bact/Alert 3D
- Ready to use Media
- Media Fill 3p

Automated Pathogen Screening System

- VIDAS
- MINI VIDAS

Genome Extraction Systems

- NUCLISENS easy MAG
- NUCLISENS mini MAG
